DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 26, 2009 has been entered.

Reason for allowance

2. After consideration of the applicant's communication filed on May 05, 2009 in response to the Final Office Action mailed on February 06, 2009, examiners proposed amendment during applicant initiated interview on May 11, 2009, and through examination of claims 46-59 and further search on the proposed amendments, claims 46-59 have been found in condition for allowance over prior arts of record.

3. The following is an examiner's statement of reasons for allowance:

Claims 46 and 53 includes the following features of a method and a computer readable storage medium having instruction stored thereon which are not taught or further suggested and would not have been obvious over prior arts of record and these claimed features are:

After intercepting and **blocking all packet** received (including each and every packets) from unauthorized user device for network access at the packet forwarding device, redirecting and proceeding with the network login authentication and authorization using the network login

controller **upon receiving the packet forwarding device's IP address from the authenticator discovery controller and using the temporary assigned layer-3 address or the static layer-2 address to the user device;**

if the user login has been **denied permission** to access the network by the authentication server; **the network login controller blocks the port** to which the user is connected and **leaves the port in an unauthorized state** and the **packet forwarding device in a non-forwarding mode**

if the user login has been **granted permission** to access the network by the authentication server **the network login controller unblocks the port** to which the user connected by **placing the port of the packet forwarding device into an authorized state and assigning the port to a permanent VLAN; and replacing the temporary layer-3 address assigned to the user device with a permanent layer-3 address;**

resetting the port back into an unauthorized state and blocks the port, wherein the resetting is performed when at least one of the following **selected action occurs; when a user successfully logs off the packet forwarding device; when a connection from the user to the port is disconnected; when no activity from the user occurs on the port for a duration of time; and when an administrator forces the port to change its state** [Resetting of the port to a blocked and unauthorized state makes sure that the authorized port does not remain in authorized state render the forwarding device vulnerable after use of the authorized port and any active established session].

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
